

Organization of the Plant Body

Angiosperms – _____

Plant Tissues (angiosperms)

Dermal tissue
(epidermis)

- 1.
- 2.
- 3.
- 4.

Vascular tissues (pipelines)

Xylem

- 1.
- 2.

Phloem

- 1.
- 2.

Parenchyma (delicate large cells, bulk, alive, can divide)

- 1.
- 2.
- 3.
- 4.

Collenchyma (small cells/pectin, alive, stretchable)

- 1.

Sclerenchyma (strong cells/lignin, varies in shape, dead)
